EL SALVADOR

7+13 DESCRIBE REACTION(S) (including relevant tests/lab data) (Continuation...)

Event Description :

This study report from EL SALVADOR was received by Adium Pharma S.A through the Jazz Safety tool of the Patient Support Program "ASOFARMA A TU LA" (reference number: SV-ADIUM-SV-0007-20250613) on 13-Jun-2025, from a consumer (caregiver) (non-healthcare professional) regarding an elderly male patient who experienced serious event of "death" (Death) during Eligard (leuprolide acetate) 45 mg therapy for prostate cancer. The needle component of the constituent device was not identified in the report. The report was sent to Tolmar on 13-Jun-2025.

The patient's medical history was unknown and current condition included prostate cancer.

Concomitant medications were unknown.

On 07-Jun-2024, the patient began receiving Eligard 45 mg every 6 months via subcutaneous route for prostate cancer (Lot numbers and expiration dates were unknown).

On 19-Apr-2025, the patient died due to unknown cause of death. The patient was 70 years old at the time of his death. It was unknown if an autopsy was performed. No further details were provided.

Action taken with Eligard in response to event was not applicable. De-challenge and Re-challenge were not applicable.

The outcome of death was fatal.

The reporter assesses the seriousness of death as serious (death).

The reporter did not provide the causality of death in relationship to Eligard and Eligard Unspecified Device.

No further query was raised.

On 24-Jun-2025, an attempt was made to contact the notifier following a request from the health authority.

On 25-Jun-2025, an attempt was made to contact the notifier following a request from the health authority.

On 03-Jul-2025, an attempt was made to contact the notifier following a request from the health authority.

On 07-Jul-2025, all three attempts were failed, and no further information was obtained.

On 07-Jul-2025, follow-up information from EL SALVADOR was received by Adium Pharma S.A through the Jazz Safety tool of the Patient Support Program "ASOFARMA A TU LA" (Reference number: SV-ADIUM-SV-0007-20250613) from a consumer (non-healthcare professional) and sent to Tolmar on 08-Jul-2025. New information included: Updated the patient's medical history (bone metastasis and high antigen levels), lab data (laboratory test abnormal) and narrative was updated.

The patient's medical history included bone metastasis and high antigen levels.

No further queries were raised.

Company Remarks (Sender's Comments) :

Evaluator Comment (Tolmar): This is regarding 70-year-old elderly male patient who reportedly died (Death) while on Eligard(Leuprolide acetate) 45mg therapy for prostate cancer. Tolmar assessed death as serious due to fatal outcome. Causal role of Eligard (drug component) in the patient's death was not assessable as lack of information regarding cause of death, events or circumstances preceding patient's death, autopsy report, relevant medical history, supportive investigations that could indicate cause of death, concomitant medications received by the patient precludes meaningful medical assessment of the report. However, advanced age of the patient and underlying prostate cancer were pre-existing risk factors for the patient's death. Death was assessed as not related to the device component of Eligard.
